

NanoString & UH Cancer Center nCounter® Launch Celebration!

Sponsored by Genomics and Bioinformatics Shared Resource (GBSR)

JOIN US

Come celebrate the launch of nCounter technology at the University of Hawaii Cancer Center! The nCounter platform provides rapid, PCR-free, and reproducible RNA expression analysis. NanoString representatives will present how you can apply this locally available technology to your research.

We will also present exciting updates on the new GeoMx Digital Spatial Profiling technology for in-situ proteome and transcriptome tissue analysis.

Lunch will be provided. Please RSVP via the registration link to be counted for food.
