

# QUEST *for a* CURE

## Diet, Nutrition and Cancer Saturday, August 24, 2024 • 10 a.m. - 12 p.m. UH Cancer Center • Sullivan Conference Center

Through Quest for a Cure, we aim to involve and engage anyone whose life has been touched by cancer and wants to learn more about the disease. Our speakers will review the latest research on nutrition and diet related to cancer, including findings from the Multiethnic Cohort Study, ongoing local and national research, and our current Healthy Diet and Lifestyle II study. They will also discuss how local foods can help prevent, manage, and reduce the recurrence of cancer as well as practical ways to incorporate these foods into our daily eating habits. The perspectives of a study participant and cancer survivor also will be shared. Light refreshments will be served for those attending in person.
